## INDEPENDENT AUDITORS' REPORT

To the Shareholders of  
Northern Uranium Corp.

We have audited the accompanying financial statements of Northern Uranium Corp., which comprise the statements of financial position as at December 31, 2016 and 2015 and the statements of loss and comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

### *Management's Responsibility for the financial statements*

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditors' Responsibility*

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

***Opinion***

In our opinion, these financial statements present fairly, in all material respects, the financial position of Northern Uranium Corp. as at December 31, 2016 and 2015 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

***Emphasis of Matter***

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which describes conditions and matters that indicate the existence of a material uncertainty that may cast significant doubt about the ability of Northern Uranium Corp. to continue as a going concern.

## **Northern Uranium Corp.**

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### **1. Nature and Continuance of Operations**

Northern Uranium Corp. (the “Company”) was incorporated on July 19, 2005 under the Canada Business Corporations Act and is considered to be in the exploration stage with respect to its mineral properties. To date, the Company has not generated significant revenues from operations and has not yet determined whether its mineral properties contain ore reserves that are economically recoverable. The Company’s common shares are listed on the TSX Venture Exchange under the trading symbol “UNO”.

The Company’s head office and location of books and records is 203-1634 Harvey Avenue, Kelowna, British Columbia, Canada, V1Y 6G2.

The recoverability of the amounts comprised in mineral properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

These financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. Continued operations of the Company are dependent on its ability to develop its mineral properties, receive continued financial support, complete equity financings, or generate profitable operations in the future. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence. These material uncertainties may cast significant doubt about the Company’s ability to continue as a going concern.

### **2. Basis of Presentation**

#### *a. Statement of Compliance*

These financial statements (the “Financial Statements”), including comparatives, have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”).

These Financial Statements were approved for issue by the Board of Directors on April 3, 2017.

#### *b. Basis of Presentation*

These Financial Statements have been prepared on a historical cost basis except for certain financial assets measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. All dollar amounts presented are in Canadian dollars unless otherwise specified.

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### 2. Basis of Presentation (continued)

#### *c. Use of Estimates*

The preparation of these financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ materially and adversely from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- i) The carrying value and the recoverability of exploration and evaluation assets, which are included in the statements of financial position. The cost model is utilized and the value of the exploration and evaluation assets is based on the expenditures incurred. At every reporting period, management assesses the potential impairment which involves assessing whether or not facts or circumstances exist that suggest the carrying amount exceeds the recoverable amount.
- ii) The valuation of shares issued in non-cash transactions. Generally, the valuation of non-cash transactions is based on the value of the goods or services received. When this cannot be determined, it is based on the fair value of the non-cash consideration. When non-cash transactions are entered into with employees and those providing similar services, the non-cash transactions are measured at the fair value of the consideration given up using market prices.
- iii) The recognition of deferred tax assets. The Company considers whether the realization of deferred tax assets is probable in determining whether or not to recognize these deferred tax assets.

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

### 3. Significant Accounting Policies

#### a. Financial Instruments

##### Financial assets

The Company classifies its financial assets into one of the following categories as follows:

*Fair value through profit or loss* - This category comprises derivatives, held for trading and financial assets acquired principally for the purpose of selling or repurchasing in the near term. They are carried at fair value with changes in fair value recognized in loss and comprehensive loss. This category includes cash.

*Loans and receivables* - These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at amortized cost using the effective interest method less any provision for impairment. This category includes receivables.

All financial assets except those measured at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is objective evidence of impairment as a result of one or more events that have occurred after initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

##### Financial liabilities

The Company classifies its financial liabilities into one of two categories as follows:

*Fair value through profit or loss* - This category comprises derivatives and financial liabilities incurred principally for the purpose of selling or repurchasing in the near term. They are carried at fair value with changes in fair value recognized in profit or loss.

*Other financial liabilities* - This category consists of liabilities carried at amortized cost using the effective interest method and includes accounts payables and accrued liabilities.

IFRS 7 establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### 3. Significant Accounting Policies (continued)

#### *b. Foreign Exchange*

The functional currency of an entity is the currency of the primary economic environment in which the entity operates. The functional currency of the Company is the Canadian dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21 - The Effects of Changes in Foreign Exchange Rates.

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated at the period end exchange rate while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in comprehensive loss.

#### *c. Exploration and Evaluation*

Exploration and development costs are expensed until such time as reserves are proven and financing to complete development has been obtained. Acquisition costs of mineral properties and tangible development costs incurred thereon, are deferred until the property to which they relate is placed into production, sold or abandoned. The carrying values of mineral properties are, where necessary, written down to fair value if carrying value is not recoverable. Costs relating to properties abandoned are written off when the decision to abandon is made.

#### *d. Asset Retirement Obligations*

The Company accounts for the recognition and measurement of liabilities for statutory, contractual or legal obligations associated with the retirement of equipment, and mineral properties when those obligations result from the acquisition, construction, development or normal operations of the assets. When determinable, a liability for future site reclamation costs, or other obligations, would be recorded at net present value and the corresponding increase in the assets carrying value would then be amortized over the remaining useful life of the asset.

Management has reviewed the Company's mineral properties for known obligations under contract, common practices or laws and regulations in effect or anticipated. The Company has determined that there are no known or quantifiable significant assets retirement obligations and accordingly, these financial statements do not include any provision related to future asset retirement.

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### 3. Significant Accounting Policies (continued)

#### *e. Loss per Share*

Basic loss per share is computed by dividing the loss available to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted loss per share is computed similar to basic loss per share except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting periods.

#### *f. Share-Based Compensation*

The Company operates an employee stock option plan whereby it is authorized to grant stock options to directors, officers, employees and consultants. Share-based compensation to employees or those that provide similar services as employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Share-based compensation to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The corresponding amount is recorded to reserves.

The fair value of options is determined using a Black–Scholes pricing model which incorporates all market vesting conditions. The number of shares and options expected to vest is reviewed and adjusted at the end of each reporting period such that the amount recognized for services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest. When the options are exercised, the applicable amounts of option reserves are transferred to share capital.

*Cash settled plans* - The Company has a deferred share unit plan whereby directors can receive compensation in the form of a deferred share unit. Upon leaving the Board, directors, at their discretion, can elect to receive either cash or shares for the deferred compensation. Accordingly under IFRS, these units are classified as compound financial instruments consisting of a debt (cash) component and an equity component. The fair value of the deferred share units is measured on the grant date as the sum of the cash value (debt component) and the equity component valued using the Black-Scholes option pricing model and is revalued at each period end. There was no equity component as at December 31, 2016 and 2015.

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### 3. Significant Accounting Policies (continued)

#### *g. Impairment of Non-financial Assets*

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit ("CGU") is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or CGU in prior years. A reversal of an impairment loss is recognized immediately in comprehensive loss.

#### *h. Flow-through Shares*

Resource expenditure deductions for income tax purposes related to exploration activities funded by flow-through share arrangements are renounced to investors in accordance with Canadian income tax legislation. On issuance, the Company bifurcates the flow-through share into i) a flow-through share premium, equal to the estimated premium, if any, investors pay for the flow-through feature, which is recognized as a liability and ii) share capital. Upon expenses being incurred, the Company derecognizes the flow-through premium liability for the amount of tax reduction renounced to the shareholders. The premium is recognized as other income.

Proceeds received from the issuance of flow-through shares are restricted to be used for only Canadian resource property exploration expenditures within a two-year period. The Company may also be subject to a Part XII.6 tax on flow-through proceeds renounced under the "Look-back" Rule, in accordance with the Government of Canada flow-through regulations. When applicable, this tax is accrued as a financial expense until paid.

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### 3. Significant Accounting Policies (continued)

#### *i. Income Taxes*

Income tax expense comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity. Current tax expense is the expected tax payable on taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recorded using the liability method, providing for temporary differences, between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Temporary differences are not provided for relating to goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting or taxable loss and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the statement of financial position date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, it does not recognize the asset.

Additional income taxes that arise from the distribution of dividends are recognized at the same time as the liability to pay the related dividend. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

#### *j. Warrants*

As part of its private placements, the Company has issued warrants and brokers' warrants. Any warrants that expire or are exercised during the year are transferred back to share capital, if originally determined to have a value.

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

### 3. Significant Accounting Policies (continued)

#### k. New Standards Not Yet Adopted

IFRS 9 “Financial Instruments” is a new standard that is a partial replacement of IAS 39 “Financial Instruments: Recognition and Measurement”. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. Its commencement date is currently unknown.

IFRS 16 “Leases” is a new standard that will be applicable to fiscal years beginning on or after January 1, 2019. IFRS 16 provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less, or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16’s approach to lessor accounting substantially unchanged from its predecessor, IAS 17. At present, the Company’s sole lease is for office space. As such, the Company is evaluating the impact of this standard.

### 4. Exploration and Evaluation Assets

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many exploration and evaluation assets. The Company has investigated title to all of its exploration and evaluation assets and, to the best of its knowledge, title to all of its properties is in good standing.

The carrying values of the Company’s exploration and evaluation assets are as follows:

	Northern Manitoba
Balance, December 31, 2014	\$ 937,500
Additions - share issuance (note 7(b))	66,000
Additions - warrants issuance (note 7(b))	34,000
Balance, December 31, 2015 and 2016	\$ 1,037,500

## **Northern Uranium Corp.**

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### **4. Exploration and Evaluation Assets (continued)**

#### ***Northern Manitoba Project***

The Company has entered into an agreement with CanAlaska Uranium Ltd (“CanAlaska”) to acquire up to 80% of its Northwest Manitoba Property.

Under the terms of the option agreement, the Company can earn up to an 80% interest in the Property by carrying out a three-stage \$11.6 million exploration program. The first stage allows the Company to obtain a 50% interest by making a non-refundable cash deposit of \$35,000 (paid) and by issuing 2,250,000 common shares (issued) valued at \$0.12 per share, 1,000,000 common share purchase warrants with an exercise price of \$0.10 for a term of two years (granted) and 1,250,000 common share purchase warrants with an exercise price of \$0.15 for a term of two years (granted), on or before March 21, 2014; these warrants expired unexercised during the year ended December 31, 2016. An additional \$50,000 payment was incurred to extend the terms of the initial agreement. The Company incurred \$600,000 in exploration expenditures on or before March 31, 2014 and issued an additional 2,250,000 common shares, valued at \$0.11 per share, on or before June 1, 2014. A further \$2,600,000 in exploration expenditures was incurred by the Company before December 31, 2014.

Upon the Company having earned the 50% interest, it has the right to a 70% option. In order to exercise the 70% option, the Company was required to incur a further \$2.8 million in expenditures on the property within a two year period (incurred) and issue an additional 5,000,000 common shares (issued at a value of \$0.02 per share) and 2,500,000 purchase warrants (granted), which shall be exercisable into common shares for a period of two years from the date of issue of the warrants at an exercise price per common share that is equal to the market price of the Company’s shares on the date immediately preceding the date of issuance of such warrants (\$0.05; these warrants expired unexercised during the year ended December 31, 2016). The Company may elect, prior to the end of the two year period, to pay CanAlaska a cash fee of \$50,000 for each incremental year of such extension.

As at December 31, 2016, the Company has spent the required funds on the Northern Manitoba project and has met the 70% earn-in agreement milestone.

Upon the Company having earned the 70% interest, it has the right to an 80% option. In order to exercise the 80% option, the Company must incur a further \$5.6 million in expenditures on the property within a two year period and issue an additional 5,000,000 common shares (issued at a value of \$0.02 per share) and 2,500,000 purchase warrants (granted), which shall be exercisable into one common shares at an exercise price per common share that is equal to the market price of the Company’s shares on the date immediately preceding the date of issuance of such warrants (market price was \$0.02; subject to regulatory requirements, these warrants are exercisable at \$0.05). These warrants expire September 15, 2018. The Company may elect, prior to the end of the two year period, to pay CanAlaska a cash fee of \$50,000 for each incremental year of such extension.

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

### 6. Accounts Payable and Accrued Liabilities

The Company's accounts payable and accrued liabilities are as follows:

	December 31, 2016	December 31, 2015
Trade payables	\$ 411	\$ 1,048
Accrued liabilities	15,000	43,840
Related party payables	391,235	428,263
Total	\$ 406,646	\$ 473,151

### 7. Share Capital and Reserves

#### a) Authorized share capital

The authorized share capital of the Company is an unlimited number of common shares without par value. All issued shares are fully paid.

The holders of the common shares are entitled to one vote per share. The holders of the common shares are entitled to dividends, when and if declared by the directors of the Company, and to the distribution of the residual assets of the Company in the event of the liquidation, dissolution or winding-up of the Company. No dividends have ever been declared or paid as at December 31, 2016.

#### b) Issued share capital

##### i) Shares issued through private placements

In January 2015, the Company closed the second tranche of a private placement announced December 2014 and issued 10,000,000 flow-through shares at a price of \$0.05 per share for gross proceeds of \$500,000, and 400,000 non-flow through units at \$0.05 per share for gross proceeds of \$20,000. Each non-flow through unit is comprised of a share and one half of a two year warrant with an exercise price of \$0.10. In connection with the issuance of the flow through shares, the Company paid finder's fees of \$40,000 and issued 800,000 finder's warrants with an exercise price of \$0.10 and an expiration of one year following the issuance. These broker warrants were valued at \$17,000 using the Black Scholes option pricing model with volatility of 159%, 0% dividends, an expected life of 1 year, and a risk free rate of 1.07%. The Company incurred additional share issuance costs related to this private placement of \$12,158.

### 7. Share Capital and Reserves (continued)

#### *b) Issued share capital (continued)*

##### *i) Shares issued through private placements (continued)*

In March 2015, the Company closed the first tranche of a non-brokered private placement and issued 23,200,000 flow-through shares at a price of \$0.05 per share for gross proceeds of \$1,160,000, and 11,852,500 non-flow through units at \$0.05 per share for gross proceeds of \$592,625. Each non-flow through unit is comprised of a share and one half of a two year warrant with an exercise price of \$0.10. In connection with the issuance of the shares, the Company paid total finder's fees of \$12,000 and issued 240,000 finder's warrants with an exercise price of \$0.10 and an expiration of one year following the issuance. These broker warrants were valued at \$9,000 using the Black Scholes option pricing model with volatility of 161%, 0% dividends, an expected life of 1 year, and a risk free rate of 1.07%.

In April 2015, the Company closed the second tranche of this private placement and issued 16,000,000 flow-through shares at a price of \$0.05 per share for gross proceeds of \$800,000, and 2,000,000 non-flow through units at \$0.05 per share for gross proceeds of \$100,000. Each non-flow through unit is comprised of a share and one half of a two year warrant with an exercise price of \$0.10. In connection with the issuance of the shares, the Company paid total finder's fees of \$72,000 and issued 1,440,000 finder's warrants with an exercise price of \$0.10 and an expiration of one year following the issuance. These broker warrants were valued at \$49,000 using the Black Scholes option pricing model with volatility of 156%, 0% dividends, an expected life of 1 year, and a risk free rate of 1.07%. The Company incurred additional share issuance costs related to this private placement of \$23,986.

In August 2015, the Company closed a non-brokered private placement and issued 12,000,000 flow-through shares at a price of \$0.05 per share for gross proceeds of \$600,000. In connection with the issuance of the shares, the Company paid total finder's fees of \$48,000 and issued 960,000 finder's warrants with an exercise price of \$0.05 and an expiration of one year following the issuance. These broker warrants were valued at \$5,000 using the Black Scholes option pricing model with volatility of 124%, 0% dividends, an expected life of 1 year, and a risk free rate of 0.42%. The Company incurred additional share issuance costs related to this private placement of \$6,769.

There was no flow-through premium liability initially associated with the above noted issuances of flow-through shares.

### 7. Share Capital and Reserves (continued)

#### *b) Issued share capital (continued)*

##### *i) Shares issued through private placements (continued)*

In October 2015, the Company closed a non-brokered private placement and issued 12,499,998 flow-through units at a price of \$0.04 per share for gross proceeds of \$500,000. Each flow-through unit is comprised of one flow-through share and one half of a non-flow through warrant. Each whole warrant entitles the holder to acquire a common share of the Company at a price of \$0.07 per shares for a term of two years. In connection with the issuance of the shares, the Company incurred share issuance costs related to this private placement of \$4,806. The Company incurred a flow-through premium of \$250,000 associated with this flow-through share issuance. As at December 31, 2015, the Company had no remaining funds relating to this private placement. As the Company has incurred sufficient expenditures relating to this flow-through issuance, we have recognized the \$250,000 flow-through premium as Other income in the Statement of Loss and Comprehensive Loss.

##### *ii) Shares issued as part of earn-in agreement*

As part of the earn-in agreement with CanAlaska for the Northern Manitoba project (Note 4), the Company issued CanAlaska 5,000,000 shares and 2,500,000 warrants upon reaching the 70% earn-in mark in September 2015. The shares were issued at \$0.02 per share and the warrants have an exercise price of \$0.05 with a term of three years.

#### *c) Stock options and warrants*

The Company, in accordance with its shareholder approved stock option plan, is authorized to grant options to directors, officers, employees and consultants, to acquire up to 10% of the issued and outstanding common shares. The exercise price of the options issued under the plan is determined by the Board of Directors at the time the options are granted. The options vest immediately upon grant, unless otherwise determined by the Board of Directors, and are exercisable for up to a period of ten years from the date of grant.

(Expressed in Canadian Dollars)

**7. Share Capital and Reserves (continued)**c) *Stock options and warrants (continued)*

Stock options and share purchase warrant transactions are summarized as follows:

	Stock Options		Warrants	
	Number	Weighted Average Exercise Price	Number	Weighted Average Exercise Price
Outstanding, December 31, 2014	4,300,000	\$ 0.15	16,858,000	\$ 0.14
Granted	-	-	19,316,249	0.09
Expired	(300,000)	0.15	(60,000)	0.10
Outstanding, December 31, 2015	4,000,000	0.15	36,114,249	0.11
Cancelled	(1,500,000)	0.15	-	-
Expired	-	-	(20,238,000)	0.13
Outstanding, December 31, 2016	2,500,000	\$ 0.15	15,876,249	\$ 0.08

All of the Company's stock options outstanding as at December 31, 2016 have an exercise price of \$0.15 and expire May 13, 2024.

The following warrants were outstanding at December 31, 2016:

	Number	Price	Expiry Date
<b>Warrants</b>	200,000	\$ 0.10	February 4, 2017 *
	5,926,250	0.10	March 26, 2017 *
	1,000,000	0.10	April 7, 2017
	6,249,999	0.07	October 14, 2017
	2,500,000	0.05	September 15, 2018
	<u>15,876,249</u>		

\* Subsequent to the year ended December 31, 2016, these warrants expired unexercised in line with their expiration date.

## **Northern Uranium Corp.**

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### **7. Share Capital and Reserves (continued)**

#### *d) Deferred share unit plan*

The Company has a deferred share unit plan whereby directors can receive compensation in the form of a deferred share unit. Under the plan, directors will earn compensation quarterly (\$5,000 initial value per quarter per director) at which time the number of deferred share units will be determined based on the Company's share price at the end of the quarter. Upon leaving the Board, directors, at their discretion, will receive cash or shares for the deferred compensation. Under the deferred share plan, directors are entitled to receive the cash value equal to the fair value of the deferred shares outstanding. Accordingly, the value of the deferred liability is equal to the fair value of the shares. For the year ended December 31, 2016, \$15,000 of deferred compensation (year ended December 31, 2015 – \$32,412) has been expensed as management fees.

In September 2016, the remaining director with a deferred share unit plan of the Company resigned and was paid \$38,571 in compensation for his time on the board, instead of being issued the 771,428 shares that had been accrued under his plan to September 30, 2016. No further DSUs have been accrued to date. As such, as at December 31, 2016, there is \$nil of deferred compensation accrued in accounts payable (December 31, 2015 – \$23,840, equating to 476,804 shares).

### **8. Commitments**

The Company is currently committed to one lease agreement. The Company shares lease premises with related parties and its share of the office premises is \$823 per month, with the final two months as triple net costs only. The current lease expires July 2018. Total minimum future lease payments for office premises for the fiscal year ended December 31, 2017 is \$9,872; total for fiscal year ended December 31, 2018 is \$4,702.

### 9. Related Party Disclosures

During the years ended December 31, 2016 and 2015, the Company had related party transactions with the following companies related by way of common directors or shareholders:

- Element 29 Ventures Ltd. (“Element 29”) – a private company owned by the Company’s CEO. Element 29 provides geological consulting services to the Company.
- Kel-Ex Development Ltd. (“Kel-Ex”) – a private company owned by a significant shareholder. A director of the Company is the CFO of Kel-Ex. Kel-Ex provides administration, payroll and office services to the Company.
- Metalex Ventures Ltd. (“Metalex”) – a publicly listed company with common directors and management. Metalex shares office space with the Company and thus have certain shared expenditures which get re-billed on a cost-recovery basis.
- Cantex Mine Development Corp. (“Cantex”) – a publicly listed company with common directors and management. Cantex shares office space with the Company and thus have certain shared expenditures which get re-billed on a cost-recovery basis.
- McMillan LLP (“McMillan”) – a business law firm; a partner of the Vancouver office became a director of the Company during the current year. McMillan provides legal services to the Company.

The Company’s related party expenses consist of the following:

	Year Ended December 31,	
	2016	2015
Geological consulting fees	\$ 45,003	\$ 435,343
Laboratory and mineralogical costs	-	6,009
Legal fees	15,364	-
Shared field expenditures	47,612	2,020,269

Allowable capital losses	19,000	No expiry	19,000	No expiry
Share issue costs	257,000	2035 to 2038	367,000	2035 to 2038
Non-capital losses available for future period	2,598,000	2017 to 2036	2,702,000	2016 to 2034

Tax attributes are subject to review, and potential adjustment, by tax authorities.

### 11. Financial Instruments and Risk Management

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Cash is carried at fair value using a level 1 fair value measurement. The carrying value of receivables and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

The Company is exposed to a variety of financial risks by virtue of its activities including credit, interest rate, liquidity and commodity price risk.

## Northern Uranium Corp.

Notes to the Financial Statements

December 31, 2016

(Expressed in Canadian Dollars)

---

### 11. Financial Instruments and Risk Management (continued)

*Credit risk* - Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's cash is in large Canadian financial institutions and it does not have any asset-backed commercial paper. The Company's receivables consist mainly of GST receivable due from the Federal Government of Canada, as well as some related party receivables (Note 9).

The Company considers the risk associated with these receivables to be remote.

*Interest rate risk* - Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. There is a very limited interest rate risk as the Company holds no material interest bearing financial obligations.

*Liquidity risk* - Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company manages its liquidity risk through the management of its capital structure and financial leverage as outlined in Note 12.

*Price risk* - The ability of the Company to explore its mineral properties and the future profitability of the Company are directly related to the market price of uranium and other minerals. The Company's input costs are also affected by the price of fuel. Management monitors uranium and fuel prices to determine the appropriate course of action to be taken by the Company.

### 12. Capital Risk Management

The Company includes equity (comprised of issued common shares, reserves, deficit) in the definition of capital.

The Company's objective when managing capital is to maintain its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

The Company expects its current capital resources will be sufficient to complete its currently budgeted exploration programs and operations through its current operating period. The Company is currently not subject to externally imposed capital requirements. The Company does not pay out dividends. The Company's investment policy is to invest its short-term excess cash in secure deposits in large Canadian financial institutions.

The Company's primary objective with respect to capital management is to ensure adequate liquid capital resources are in place to fund the exploration and development of its mineral properties while maintaining its ongoing operations. To secure the additional capital to pursue these plans, the Company may attempt to raise additional funds through the issuance of debt and or equity.

## **Northern Uranium Corp.**

Notes to the Financial Statements

### **13. Supplemental Disclosure with Respect to Cash Flows**

Significant non-cash transactions for the year ended December 31, 2016 included cancelling 1,500,000 stock options at a value of \$171,062, recognized through reserves and deficit and 20,238,000 warrants at a value of \$403,000 through reserves and share capital.

Significant non-cash transactions for the year ended December 31, 2015 included:

- a) Granting 3,500,000 broker warrants valued at \$80,000 as share issuance costs on private placements;
- b) Issuing 5,000,000 common shares and 2,500,000 warrants to CanAlaska pursuant to the mineral property option agreement valued at \$66,000 and \$34,000 respectively;
- c) Cancelling 300,000 stock options at a value of \$36,900, recognized through reserves and deficit and 60,000 warrants at a value of \$1,000 through reserves and share capital.
